

**2400**Watts  
peak power

### Immense Power

Each Black Series speaker contains 2400 watts of raging power. Designed and tuned in the USA, each one is DSP-controlled and includes a custom crossover, superior tuning and active thermal protection. Each Black Series loudspeaker also features a built-in mixer with two Mic/Line combo inputs, volume controls and a balanced XLR mix output.

### Thrilling Performance

Black Series speakers are designed to exacting standards. Specifically crafted, purpose-matched components come together to give you maximum efficiency and incredible power. Each loudspeaker has an optimized 90° x 60° coverage field and an extensively tested high-frequency waveguide, giving you maximum sonic impact and creating an energized atmosphere of sound.

## LIVE DRIVE

**Live Drive** wireless control places the **Black Series** in a class all their own—nothing else even comes close. This flagship line of active loudspeakers and subwoofers brings together massive power, select drivers, advanced DSP control with Live Drive wireless access over multiple units, and solid construction to deliver excellent sound and flawless, reliable performance in any audio environment.

Achieve peak **Black Series** performance at any time—and from any location—with the **Live Drive** wireless control app for iPad, iPod, and iPhone. Live Drive controls:

- DSP Equalization
- Level/Mute
- Time Alignment
- Dynamics/Compression
